

PRODUCT DESCRIPTION

To remove any bleach residues on greenhouse roofs, **INDALOBLANC® CLEAN** was specially developed for this purpose.

It is important to know that this product is suitable for any type of greenhouse roof (plastic, glass, etc.).

CHARACTERISTICS

- It is a liquid product which is soluble in water.
- It effectively eliminates all possible traces of all products in the Indaloblanco range.
- Non-aggressive against wire and plastic.

HOW TO USE

INDALOBLANC® CLEAN is applied to the cover of the greenhouse.

The steps listed below should be carried out in order to achieve the greatest results with **INDALOBLANC® CLEAN**:

- The product must be poured into the application tank and mixed with water, which must be clean and free of physical and/or chemical contaminants.
- Since **INDALOBLANC® CLEAN** dissolves fully in water, continuous mixing is not required during application.
- Spray the greenhouse cover with the **INDALOBLANC® CLEAN** solution, then clean the product residue with pressurised water.

DOSE

The dosage may be modified based on the degree of degradation of the product to be cleaned, as well as its type and durability.

- From 10-40L of **INDALOBLANC® CLEAN** and 100 L of water.

We recommend that you do a preliminary test in an area of roughly 1 m² at the used dosage to determine the efficacy of the product on the cover being cleaned.

RECOMMENDATIONS AND PRECAUTIONS

- IMPORTANT: To dampen the surface being cleaned, the product must be sprayed upon it. To avoid leaks within the greenhouse, under no circumstances should excessive amounts of the solution be applied to the plastic.
- Never use pressure when applying the product because the idea is for it to act on the area being cleaned.
- Minor crop burns may occur if the product solution spills into the greenhouse.
- The plants are not harmed by the subsequent pressurised cleaning water added.
- It should not be mixed with other products.
- Clean water should be used to clean the application equipment.

OTHER USES

- This product is ideal for cleaning filters and agricultural equipment.

COMMERCIAL FORMATS

INDALOBLANC® CLEAN is available in units of 20 L, 200 L and 1.000 L.

NOTE: The directions for usage are provided based on our testing and knowledge and they are not intended to imply any commitment on the part of INDALOBLANC S.L. They also do not exempt the consumer from inspecting and verifying the goods to ensure that they are being used correctly. For proper traceability, any claims must be accompanied by the original packaging.

INDALOBLANC S.L. disclaims any responsibility for how their products are used by the parties engaged in the application and restricts its liability to any potential damages that can be directly and solely attributed to defects in the supplied products' manufacturing.
