

### PRODUCT DESCRIPTION

**INDALOFÉRTIL® SUNBLOCK** is a solid mixture of calcium and magnesium. This fertilizer allows the simultaneous assimilation of both macronutrients (calcium and magnesium) in the crops. Moreover, **INDALOFÉRTIL® SUNBLOCK** helps to reduce the crop solar stress because it has a barrier effect in the surface of the plant, against sunburn and sunstroke without affect the photosynthesis.

"Fertiliser usable in organic plant production according to Regulation (EU) 2018/848 complies with the UNE 142500 Standard"

### COMPOSITION

- Calcium oxide (CaO): 47% w/w
- Magnesium oxide (MgO): 2% w/w
- pH (10%): 8±0.5

### FEATURES AND APPLICATIONS

- Powdered product; readily soluble in water.
- Reduces UV and IR radiation damage.
- Thanks to its hiding power, the thermal stress is reduced in the plant.
- Product can be applied with standard spray equipment.
- Free of heavy metals.

### RECOMMENDED USAGE

Recommended Dose	
• Citrus trees, olive trees, fruit trees and tropical trees:	40-60 kg / 1000 L
• Melon and watermelon:	20-40 kg /1000 L

**Foliar application on all crops**

Once **INDALOFÉRTIL® SUNBLOCK** has been poured in the tank, it is recommended to ensure the perfect dissolving of products, mix around 5/10 minutes before the application.

### APPLICATION

- Fill the tank with 50% water.
- Slowly add the product, avoiding sudden pours.
- Fill the rest with water and shake well.
- Spray on the crops, applying two sprays per tree. The second spray should be applied in the opposite direction over the first pass once dry.

**Recommendations:**

- Ensure continuous agitation during mixing and application.
- Clean the equipment with water after use to avoid residues.

### STABILITY

**INDALOFÉRTIL® SUNBLOCK** remains stable under proper storage conditions for 24 months. After that period, it may still be usable, but it may have lost some of its properties.

### COMMERCIAL FORMATS

**INDALOFÉRTIL® SUNBLOCK** is palletized in 60-unit pallets of 20 kg each (sales unit: kg).

Product compatibility: Do not mix with sulfates or acid products. However, it is advisable, under the user's responsibility, to carry out a small-scale compatibility test before mixing.

Note: the instructions for use are made according to our tests and knowledge. They do not release the consumer from the examination and verification of the products for their correct use. The company's liability shall be limited to the value of the goods used. Claims must be accompanied by the original packaging to allow proper traceability.
