

### PRODUCT DESCRIPTION

**INDALOBLANC® CLEAN** is a greenhouse roof washer. It is designed to remove the remaind indaloblanco bleaching products on the greenhouse roof. This product can be used on all types of greenhouse (plastic, glass,...).

#### CARACTERICTS

- It is a water-soluble liquid product.
- It removes all the Indaloblanco bleaching products.
- Not aggressive against wire or plastic.

### RECOMMENDED USAGE

**INDALOBLANC® CLEAN** is applied on the cover of the greenhouse.

To obtain the best results with **INDALOBLANC® CLEAN** it is necessary to follow the following steps:

- Mix **INDALOBLANC® CLEAN** with the necessary amount of clean water. The water must be clean and free of physical and chemical contaminats.
- **INDALOBLANC® CLEAN** is a water-soluble product. It is not necessary to maintain continuous agitation during its application.
- Apply the solution onto a greenhouse surface. Afterward, the grengouse surface should be cleaned with high-pressure cleaner water.
- The doses are indicative; they could be change according to the typology and durability of the product to be cleaned.
- Depending on the thickness and age of the layer of product to be removed, the concentration of **INDALOBLANC® CLEAN** can be adjusted.

### DOSES

Dosages will vary depending on the degree of deterioration of the product to be cleaned and its type and durability.

#### Recommended Dose

**10 to 40L Indaloblanco Clean/100L water**

It is recommendable to carry out a preliminary test on approximately 1 m<sup>2</sup> to see the effectiveness of the product on the greenhouse roof.

### OTHERS USES

- Apto para la limpieza de los filtros y equipos agrícolas

### PRECAUTIONS

- **IMPORTANT:** use **INDALOBLANC® CLEAN** to mist the surface in order to avoid leaks inside the greenhouse.
- Never apply the product under pressure since the goal is to moisture the roof with to leak into the greenhouse.
- **It can cause small burns on the leaves of the crop if the solution of the product leaks inside the greenhouse. The cleaning water, after applying the product solution, does not cause damage to the plants.**
- It should not be mixed with other products.

It is recommended to clean the equipment used in the application with clean water.

### STABILITY

**INDALOBLANC® CLEAN** remains stable under proper storage conditions for 24 months. After that period, it may still be usable, but it may have lost some of its properties.

### COMMERCIAL FORMATS

**INDALOBLANC CLEAN** comes in 20L, 200L and 1000L containers.
