PRODUCT DESCRIPTION

INDALOFÉRTIL® SUSTRATO PREMIUM is a substitute for traditional soil that allows the proper anchoring and growth of the plant's root system. **INDALOFÉRTIL® SUSTRATO PREMIUM** is optimized in physical, chemical, and biological properties to support the root and nutritional development of the plant.

COMPOSITION

- Composition
 - 40% Sphagnum peat
 - 40% Fibrous coco
 - 15% Black peat
 - 15% Perlite
- NPK Fertilizer 20–10–10 (controlled release for 3 months): 1g/L
- Bulk density: 308 g/L
- Organic matter (d.m.): 64%
- pH: 6.5
- Electrical conductivity: 0.43 mS/cm
- Granulometry: 0/20

APPLICATION

- Fill the pot with gravel for drainage action.
- Add a layer of **INDALOFÉRTIL® SUSTRATO PREMIUM** on top of the gravel.
- Remove the plant from the old pot with the root ball intact and place it centered in the new pot, leaving space on the sides.
- Add **INDALOFÉRTIL® SUSTRATO PREMIUM** around the perimeter and compact.
- Water generously until drainage occurs at the bottom.
- Decorate the top with pine bark, volcanic gravel, or pebbles.

SAFETY

Class A: Heavy metal content is below the authorized limits for this classification.
No special requirements are needed for use.
DO NOT INGEST
P102 Keep out of reach of children.
P270 Do not eat, drink, or smoke while handling.

COMMERCIAL FORMATS

INDALOFÉRTIL® SUSTRATO PREMIUM is palletized in 120-unit pallets of 20L each and 42-unit pallets of 50L.
