

TECHNICAL DATA SHEET
**INDALOFÉRTIL® SUSTRATO
UNIVERSAL**

indalofertil

Página 1 de 1

PRODUCT DESCRIPTION

INDALOFÉRTIL® SUSTRATO UNIVERSAL is a substitute for traditional soil that allows the proper anchoring and growth of the plant's root system. **INDALOFÉRTIL® SUSTRATO UNIVERSAL** is optimized in physical, chemical, and biological properties to support the root and nutritional development of the plant.

COMPOSITION

- Composition
 - 50% Fibrous coco
 - 30% vegetable compost
 - 20% Black peat
- NPK Fertilizer 20–10–10 (controlled release for 3 months): 1g/L
- Bulk density: 434 g/L
- Organic matter (d.m.): 52%
- pH: 7.0
- Electrical conductivity: 1.46 mS/cm

APPLICATION

- Fill the pot with gravel for drainage action.
- Add a layer of **INDALOFÉRTIL® SUSTRATO UNIVERSAL** on top of the gravel.
- Remove the plant from the old pot with the root ball intact and place it centered in the new pot, leaving space on the sides.
- Add **INDALOFÉRTIL® SUSTRATO UNIVERSAL** around the perimeter and compact.
- Water generously until drainage occurs at the bottom.
- Decorate the top with pine bark, volcanic gravel, or pebbles.

SAFETY

Class A: Heavy metal content is below the authorized limits for this classification.
No special requirements are needed for use.
DO NOT INGEST
P102 Keep out of reach of children.
P270 Do not eat, drink, or smoke while handling.

COMMERCIAL FORMATS

INDALOFÉRTIL® SUSTRATO UNIVERSAL is palletized in 36-unit pallets of 70L each.
